June Meeting will be at MARCS Field in Madison

The June 8, 2006, as well as the rest of our summer meetings, will be held at the MARCS Kettle field in Madison. The June meeting will be a work event to get the field ready for our June 10 Fly In. Come

early to help because the more we can get done on Thursday, the easier it will be on Saturday morning. We'll hold the meeting outdoors unless we have bad weather and if that happens we will meet at the Crossroads Lounge east of the field on the corner of 12 & 18 and County Trunk AB. Most likely we'll eventually go there for something to eat anyway.

Hope to see all you Eagles at the MARCS field. *Le Roy* 

A Silly Solution ? Is your mailbox flooded with mail concerning gas prices and illegal immigrants? To boycott oil companies or not; to provide amnesty to illegal immigrants or not, etc.

Since we have become jaded to the various solutions proposed by the Republicans, Democrats, Sierra Club, ACLU, etc. I have elected to solve the problems as they affect me. It solves both my gas and illegal immigrant problems.

I have hired illegal immigrants to push my car. They're plentiful and cheaper than buying gas. *Anonymous*

March Minutes - By Mark Johnson

Treasures report: Le Roy said we have 17 current members. Secretary's report: Mark read through the minutes from last month, lots to go over with up-coming event.

Business: We talked about advertising fees. It will be discussed again next month. I was asked to resend the flyer for the Eagle event so I hope everyone was able to put it up at there favorite places.

Continued on page 2

Minutes – Continued from page 1

Further discussion of our June 10th event continued. Mike Pirkle is not available to help with the raffle. Bill Kinney volunteered to work the flight line last month and I missed it in the minutes. We talked about different things to purchase for the raffle, but are still not totally set. We asked the some people at the meeting to solicit different hobby shops in the area for some raffle prizes. Tom Lazar will contact Hobby Horse, Ray Walsh RC Performance, Richard Cohoon Doctors, and Mark Johnson Schultz Sport and Hobby. Le Roy has not heard back from Rob Goebel about using his P.A. System. Richard Cohoon volunteered to contact Lyle Stone about doing the P.A.

We went through the menu. Richard Cohoon presented the club a proposal to cook the food out of his trailer and take care of all the expense, purchasing supplies, and cooking with his wife for 20% of the proceeds. All he will need is a gas grill to be provided by us (MARCS). It was voted YES to go with this setup.

We will be doing field preparation at the June meeting. Carl Bachhuber, according to Le Roy will not be at the event this year because he will be attending the Balsa USA event that day as will Ray Walsh.

We also discussed the newsletters that are being mailed and it was voted to use black and white print for the publication because the color printing is too expensive. **Mark** 

Trez/Ed Sez – By Le Roy Stuczynski`

Hi Eagles. It looks like another event is upon us. Unfortunately this year we could have some lower attendance due to the Balsa USA 1st Annual Warbird Classic on June 9, 10, and 11 in Menominee, MI. Let's hope it doesn't have too much of an effect on our event. Carl Bachhuber, probably Balsa USA's biggest customer, will be attending as well as Ray Walsh to fly and display his beautiful Fokker D-VII. We are proud of you guys and know it is an honor for both of you to attend the event. And represent the Screamin' Eagles.

We have learned that several other Eagles will be unable to attend the event so we are going to be spread pretty thin this year. Thank goodness for the concession arrangement proposed by Richard Cohoon and his wife. Perhaps some of the MARCS club members would be willing to help out and we Eagles could pay back the favor by assisting at Warbirds Over Dane the following weekend. I know I plan on attending that event and will offer to help out.

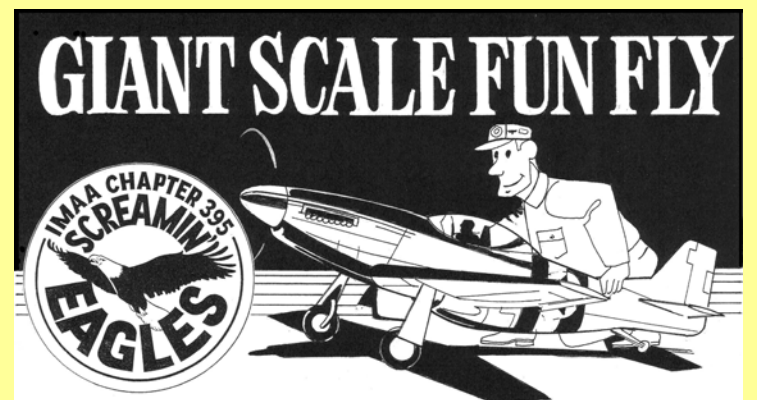

As you noticed in the minutes, we will no longer be printing color copies of the newsletter for mailing to those of you who receive the rag by snail mail. Perhaps those of you without computers can view a color version at the library or on a fellow Eagle's computer. The cost of color printing for a 6 page document is \$3.00 per newsletter at Insty Prints and that is with a 50% discount because the owner is a friend of mine. The four page newsletters run \$2.00 each but when I insert a lot of pictures we're in the 6 page format. I, and those of you who have seen a copy, have to admit the Insty Prints product is high quality.

The alternative is for me to print two sided color copies on my inkjet printer. I have tried that and it works pretty well but color ink is pretty costly and, while I know it isn't as costly as Insty Prints, I have no idea what to charge the club for my cost. I've tried to do some research on the internet about per page color inkjet printing cost. It is not an exact science because of the inconsistency of color used per page (photo vs. text area) varies greatly. I have tried refilling cartridges as well as using recycled cartridges with very inconsistent quality results.

Well that's the story why you snail mail recipients are getting a black and white copy. Perhaps we can revisit the topic at a future meeting.

Meanwhile, don't forget to get out to the MARCS field for our June meeting to help with the preparation for the weekend's event.

Le Roy 

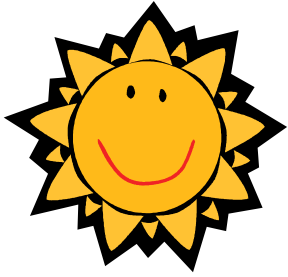

**Hosted by the Screamin' Eagles,
IMAA Chapter 395**

June 10, 2006

**At the Madison Area Radio Control Society's
"Kettle Field", Located on Hwy 12 & 18, Madison, WI.**

From the Gold Coast Radio Controllers Club, Boca Raton FL

Many of us are not young kids anymore, but whether you're young or old, it really doesn't matter. There are so many problems going on all around us that I think its time to slow down and get familiar with yourself.

Being here on our little piece of heaven (Florida) is wonderful, but it comes along with an unforgiving sidekick. I'm referring to that great big beautiful

sun that brings us all of those wonderful days. However, it also brings along with it many nasty problems. Statistics show that there are 700,000 Americans who develop some sort of skin cancer every year. Naturally, the best way to avoid this is to stay out of the sun, but we can't do that; we have to fly!

That means you should find ways to protect yourself. I suggest getting rid of those baseball caps. They may look great with fancy slogans and designs, but they only have one good feature, especially for guys like me. It covers the part of the head where the hair is thinning out a little, but it leaves your face, ears, and neck uncovered and that's just asking for trouble. Wear a hat with a wide brim, or one that has a flap in the back to cover your neck—anything that will shade the skin.

Where other exposed parts of the body are concerned, use a sun screen with at least a 15 SPF rating. If it's the dollar that is making the difference, think of it as another tank of fuel. It's a good investment.

There are so many different types of cancer. Should you ever develop some sort of abnormal looking spot, don't be a Mr. Macho. It could be nothing or something minor, but check it out ASAP before it turns into something major.

Terms and Definitions

Melanin: The substance found in skin that gives it its color. The darker a person, the more melanin they have. It acts as a natural guard against harmful UV rays.

Basal Cell Carcinoma: The most common type of skin cancer; usually found on the face and neck. Those who work outside or spend long hours of leisure time in the sun are more prone to this type of cancer. Basal cell carcinoma is rarely fatal.

Melanoma: The most dangerous form of skin cancer; usually found on larger parts of the body: arms, leg, and trunk. It appears as a dark patch on the skin. When caught early, melanoma is almost 100% curable.

Metastasis: The spread of cancer throughout the body.

Squamous Cell Carcinoma (Non-melanoma Skin Cancer): The second most common form of skin cancer caused by prolonged exposure to the sun. It is found mostly on body parts exposed to the sun: head, ears, shoulders, and arms.

Sun Protection Factor (SPF): The amount of protection the sunscreen provides. Usually expressed in numbers; the higher the number the more protection. For the best protection, apply sunscreen liberally and often (especially if you come in contact with water).

"When one engine fails on a twin-engine airplane you always have enough power left to get you to the scene of the crash."
